PRICE LIST

TO ACCOMPANY THE
TROPICAL PLANTING
BOOK

OF THE

ROYAL PALM
NURSERIES

ONECO, MANATEE COUNTY, FLORIDA,
U. S. A.

●
Established 1883

●
THIS PRESENT PRICE LIST abrogates all
previous terms, conditions, and prices.
Authorized dealers desiring to buy in
quantity should write us.

●
Issue of
1941

BUSINESS RULES—PLEASE NOTE

All prices in this catalogue are net delivered to carrier, purchaser to pay cost of transportation.

For prepayment of SMALL packages by mail, add 25% of amount of order. Foreign customers add 30%. Any expense entailed in obtaining documents for foreign orders must be borne by customer.

We cannot fill orders amounting to less than \$1. Such orders are a positive loss to us. Should you want a special plant amounting to less than that, add 25 cents, plus postage.

TERMS. Cash with order. Remit by Postal or Express Money Order on Oneco, bank draft, or personal check. Currency by open mail is unsafe. Foreign customers may remit by International Postoffice Order on Bradenton, Fla., or by bank draft.

In applying prices, 5 of a variety will be sold at the 10 rate. This applies to single varieties only and not assorted plants.

GUARANTEEING PLANTS. This is not done by any reputable nurseryman *unless* he charges prices sufficiently high to more than offset any possible loss. When good stock is received in good condition, no difficulty should be experienced in getting it to grow and do well unless the conditions are not favorable, and it is obviously not just or logical for the nurseryman to have to assume responsibility for cultural failures.

It would also hardly be fair to the customer who takes proper care of stock and who understands the requirements of different plants, to charge a price higher than normal merely to protect the nurseryman from losses incurred by guaranteeing stock to careless, incompetent, or unscrupulous persons.

OUR RESPONSIBILITY. We exercise the greatest care to have our plants *true to label*, both as a matter of policy and because deliberate carelessness or deceit would be business suicide. We hold ourselves prepared, on proper proof of error on our part, to make replacement of any tree or plant that may prove otherwise, up to the amount originally paid for them, but no more. To this the purchaser agrees when ordering from us.

Our responsibility for safety of plants ceases after delivery of the goods to public carrier.

SUBSTITUTION. In ordering, please state whether substitutions will be permitted, as we feel at liberty, when no instructions accompany the order, to replace with other varieties as nearly similar as possible.

RESERVE ORDERS for stock for future delivery must be accompanied by a deposit of 25 per cent of the value of the order to insure us in booking the order and reserving stock.

C. O. D. ORDERS cannot be accepted unless accompanied by 25 per cent of the total amount as a guarantee of acceptance on delivery.

NEW LISTINGS. Several items have been added to this price list which are not listed in "Tropical Planting". Descriptions of these are given in the back of this list.

ALSO, SEVERAL ITEMS LISTED IN "TROPICAL PLANTING" ARE NO LONGER STOCKED, AND ARE OMITTED FROM THIS LIST.

PRICE LIST OF PLANT MATERIALS

NOTE ON ABBREVIATIONS:

o. g. means opens ground.

spec. means specimens.

app. means on application.

B & B means balled and burlapped.

DESCRIPTIONS OF ADDED LISTINGS

Palms

ATTALEA cohune. Cohune Palm. Guatemala. Particularly handsome palm with immense pinnate leaves 15 to 30 feet long; upright in growth, with gracefully curved tips. Suited to extreme southern part of state and for large greenhouses.

CHAMAEDOREA species. T. A handsome, small, pinnate-leaved palm, shade-loving, and suited to patio use.

DICTYOSPERMA alba. A graceful and distinctive palm for conservatory use, with heavy, drooping, pinnate leaves.

DICTYOSPERMA species. Resembles *D. alba*.

HYOPHORBE amaricaulis. Bitter-Stem, or Bottle Palm. Similar to *H. Verschaffeltii*, with stout trunk and pinnate leaves.

LATANIA Loddigesii. Strong-growing fan palm. Young plants sometimes with reddish tinge.

LIVISTONA australis. Australia. Tall-growing fan palm with dense crown.

MARTINEZIA caryotaefolia. S. A. A very decorative palm with feathery leaves, somewhat resembling *Caryota urens*. Attains a height of 25 to 35 feet. Slim trunk and leaves heavily armed with sharp, black spines. Grows well in shade or sun.

PSEUDOPHOENIX. Somewhat resembles Royal Palm, smooth, light gray trunk, and pinnate leaves.

THRINAX parviflora. Thatch Palm. Fan leaf palm attaining maximum height of 30 feet. Leaves yellowish green above, and silvery gray beneath.

Shade Trees

BAUHINIA tomentosa. T. A tender, summer-flowering type, having foliage and bloom at the same time. Leaves larger than other varieties and very distinctive. Flowers shaded pink, cream, and white.

BRACHYCHITON populneum (*Sterculia diversifolia*). Kurrajong. To 60 ft. Very well suited to dry locations.

CITHAREXYLUM spinosum. Fiddle-Wood. Attains a height of 50 ft. Slender racemes of white flowers.

PHYLLOCARPUS septentrionalis. Guatemala. Tree to 60 ft., shining, dark green leaves. Fragrant red flowers.

Shrubs

CALLIANDRA haematocephala. Decorative shrub with round, brush-like heads of crimson flowers.

CRAPE MYRTLE, *Queen's*. (*Lagerstroemia speciosa*). T. India
A tree reaching 50 to 60 feet in height, with magnificent foliage and gigantic panicles of mauve flowers. Usually seen as a shrub, blooming when small.

Decoratives

FURCRAEA *Lindenii*. A variegated, agave-like plant, with broad white stripes. Attractive house plant.

Tropical Fruit

BRITOA *acida*. Brazil. Very similar to the Guava, the oval or round yellow fruit has a pleasant, though acid, flavor. Plant reaches a height of 25 to 30 feet, with slender branches and somewhat glossy leaves.

CARICA *papaya*. The Papaya, which in recent years has become so well known that it needs little description. Our plants are of the bi-sexual strain.

CHRYSOPHYLLUM *Cainito*. Star Apple. An ornamental large or medium sized tree with dark green leaves. The smooth, round, purplish fruit contains a white, semi-transparent jelly-like pulp which, when fully matured is sweet and agreeable.

DOVYALIS *hebecarpa*. Ketembilla. Superior to *Dovyalis caffra*, the Kei-Apple, but more limited in its distribution, and less robust. Reaches a height of 15 to 20 feet, with slender branches, often drooping under the weight of their fruit. Fruit about 1 inch in diameter, maroon-purple, velvety on surface. Pulp is sweet and luscious. Plant likes moisture, both in atmosphere and soil.

EUGENIA *Jambos*. Rose Apple. Evergreen tree with good sized pinkish white, rose-scented and rose-flavored fruits, valuable for cooking and candying.

MELICOCCA *bijuga*. Gineup or Spanish Lime. Handsome tropical tree with evergreen, lustrous foliage. Large, plum-like fruits vary in quality from sweet to subacid. The "Mamoncillo" of Cuba, where it is quite popular.

MUNTIGIA *calabura*. A fast growing tree, eventually reaching a height of about 30 feet. The red fruit is edible and tasty as fresh fruit, and especially good for jam and jelly. Bears in 12 to 18 months.

MUSA *sapientum*. Banana. Hart's Choice (Lady Finger), one of the most hardy sorts. Fruit delicious.

Orinoco. Horse Banana. A sort of plaintain. Fine for cooking, but liked raw by many. Very hardy.

Cavendish. Dwarf; very tender. Fruit rich and fine.

Daca. An ornamental variety. Fruit tender and of distinctive flavor.
